Lencore Spectra i.Net Installation And Operation Manual

A 110 block is a type of punch block used to terminate runs of on-premises wiring in a structured cabling system. The designation 110 is also used to describe a type of insulation displacement contact (IDC) connector used to terminate twisted pair cables, which uses a punch-down tool similar to the older 66 block

110 block - Wikipedia

Twisted pair cables Twisted pair wiring. Twisted pair cable consists of a pair of insulated wires twisted together. It is a cable type used in telecommunication for very long time.
