YOU CAN NOW PRINT OUT YOUR OWN CATALOGUE. When we send you an email message that our latest is out...you can now print out your catalogue in the same format as in our hard paper version.

### **March – April 2019 Catalogue | Rare Plants**

The flora of Canada is quite diverse, due to the wide range of ecoregions and environmental conditions present in Canada. From the warm, temperate broadleaf forests of southern Ontario to the frigid Arctic plains of Northern Canada, from the wet temperate rainforests of the west coast to the arid deserts, badlands and tundra plains, the biodiversity of Canada's plants is extensive.

The Pinophyta, also known as Coniferophyta or Coniferae, or commonly as conifers, are a division of vascular land plants containing a single extant class, Pinopsida. They are gymnosperms, cone-bearing seed plants. All extant conifers are perennial woody plants with secondary growth. The great majority are trees, though a few are shrubs. Examples include cedars, Douglas firs, cypresses, firs ...

Medicinal plants and extracts are increasingly important export products for many developing countries. As populations age and consumers' preference for natural health products increases, medicinal plants present a niche that exporters in many least developed countries (LDCs) are looking to develop for sustainable production and export trade. ITC's Market Insider reports on medicinal plants ...
