Chondrichthyes (/ k ? n ? d r ? k ? i ? z /; from Greek ?????- chondr-'cartilage', ????? ichthys 'fish') is a class that contains the cartilaginous fishes: they are jawed vertebrates with paired fins, paired nares, scales, a heart with its chambers in series, and skeletons made of cartilage rather than bone. The class is divided into two subclasses: Elasmobranchii (sharks, rays ...

Wirtschaftlich bedeutend sind die Europäische Sardelle (*Engraulis encrasicolus*) und die Südamerikanische Sardelle (*Engraulis ringens*), beide aus der Unterfamilie *Engraulinae*. Während die Europäische Sardelle ein wichtiger Speisefisch ist und oft eingesalzen als Anchovis angeboten wird, wird die Südamerikanische Sardelle oder Anchoveta vorwiegend zu Fischmehl und Fischöl verarbeitet.

Gadus é um género de peixes demersais da família Gadidae, vulgarmente conhecidos como bacalhaus, embora existam outras espécies designadas como bacalhaus em outros géneros.. Até há pouco tempo, eram reconhecidas três espécies neste género. A taxonomia moderna inclui uma quarta, o escamudo-do-alasca (Gadus (=Theragra) chalcogrammus), que não é separado do escamudo-da-noruega ...
