Air Pollution and its Control Measures 447 The other choice for an electric utility can be the use of natural gas as a fuel. Fuel switching based on meteorological conditions or air pollution forecasts

Air Pollution and its Control Measures

A catalytic converter is an exhaust emission control device that converts toxic gases and pollutants in exhaust gas from an internal combustion engine into less-toxic pollutants by catalyzing a redox reaction (an oxidation and a reduction reaction). Catalytic converters are usually used with internal combustion engines fueled by either gasoline or diesel—including lean-burn engines as well ...

How a catalytic converter works. Before catalytic converters were developed, waste gases made by a car engine blew straight down the exhaust tailpipe and into the atmosphere.

How do catalytic converters work? - Explain that Stuff

The PrevEx is our flammability analyzer for lower flammable limit monitoring (LFL/LEL). Fast: Less than one-second response time; Universal: Gives consistent and reliable readings even when faced with multiple or changing solvent concentrations.
