Rearing caterpillars One way to identify a difficult caterpillar is to rear it to the adult stage, which may be easier to recognise. If you want to try this, you will need to note what kind of plant the caterpillar was on and provide the same type of leaves for it to eat. Caterpillars can be reared in a ventilated plastic container large enough ...

Do Venomous Caterpillars Live in Your Yard? Compiled by Wendi Hartup Area Natural Resources Extension Agent Forsyth County Cooperative Extension If you are walking in the forest be wary of a small caterpillar that can be found on foliage of forest, shade and ornamental trees.

### **Do Venomous Caterpillars Live in Your Yard?**

If you want to catch and raise monarch caterpillars, the easiest way is to gather caterpillars or eggs from milkweed plants. If you find an egg, pull the leaf off of the plant and place it in a small container lined with a moist paper towel. Each day, sprinkle a few drops of water onto the paper towel.

Metamorphosis of a Monarch butterfly: The Monarch butterfly life cycle begins with a group of small white eggs laid on the underside of leaves. The eggs hatch three to six days after they are laid into larva called a caterpillar. Caterpillars are quite small at hatch and barely visible to the naked eye. Caterpillars
