UNESCO – EOLSS SAMPLE CHAPTERS ANIMAL REPRODUCTION IN LIVESTOCK – Embryo Production - Fiammetta Berlinguer ©Encyclopedia of Life Support Systems (EOLSS) 2. In vitro embryo production In vitro embryo production (IVP) is a reproductive biotechnology that has great potential for speeding up genetic improvement in livestock, but it is also an important

EMBRYO PRODUCTION - Encyclopedia of Life Support Systems

Singular terminology issue "Cattle" can only be used in the plural and not in the singular: it is a plurale tantum. Thus one may refer to "three cattle" or "some cattle", but not "one cattle". "One head of cattle" is a valid though periphrastic way to refer to one animal of indeterminate or unknown age and sex; otherwise no universally used single-word singular form of cattle exists in modern ...

Cattle - Wikipedia

Embryo production by in vitro techniques has increased steadily over the years. For cattle where this technology is more advanced and is applied more, the number of in vitro produced embryos transferred to final recipients was over 30,000 in 1998.

Embryo production by ovum pick up from live donors

Bio Preg Check uses and markets the BioPRYN blood pregnancy test for cattle. BioPRYN® (Pregnancy Ruminant Yes/No) is a pregnancy detection procedure in cattle. It measures the presence of Pregnancy-Specific Protein B (PSPB) in the blood circulation of the animal.
