jam and bind along the runway. We locked it out before it could run off the runway. This breakdown brought production to a halt. We needed a new crane—fast! Now... Thankfully, Konecranes installed a new 6-ton CXT crane in only a few weeks. They spaced out the two hoists so we could lift the copper tubing from both ends the exact same way, every time.

Safety & Risk Office 5-Minute Safety Talk No. 12 Caught In

Caught or Crushed Injuries ... training and learn about the caught/crush hazards and pinch points specific to your tasks, tools,

and equipment so you can take precautions. ... a jam, repairing, or servicing a machine. Caught/Crush hazards are not limited to machinery

Caught or Crushed Injuries - TribalFirst.com

Caught/crush hazards are not limited to machinery. Vehicles, powered doors, and forklifts can pose a crush hazard unless they have been blocked or tagged out. Never place your body under or between powered equipment unless it is de-energized. Doors, file drawers, and heavy crates can pinch fingers and toes.

Toolbox Talk # 5.01 – Caught Between or Crushed

the victim was caught, the co-worker climbed up to help the victim and found him caught in the machine. The co-worker immediately shut the machine off and radioed for help on a hand-held radio. Other plant employees came to his aid and called 911 for help. The police and EMS arrived and pronounced the victim dead at the scene.
