Poverty Manual, All, JH Revision of August 8, 2005 Page 124 of 218 Chapter 8. Understanding the Determinants of Poverty Summary A poverty profile describes the pattern of poverty, but is not principally concerned with explaining its causes.

Chapter 8. Understanding the Determinants of Poverty

Other spurious things. The old version of this site.; Discover a correlation: find new correlations.; Go to the next page of charts, and keep clicking "next" to get through all 30,000.; View the sources of every statistic in the book.; Or for something totally different, here is a pet project: When is the next time something cool will happen in space?

Now a ridiculous book! - Spurious Correlations

The causes of schizophrenia have been the subject of much debate, with various factors proposed and discounted or modified.. The language of schizophrenia research under the medical model is scientific. Such studies suggest that genetics, prenatal development, early environment, neurobiology, and psychological and social processes are important contributory factors.

x Hepatocellular carcinoma (HCC) is a raising condition both world-wide and in Europe, already being one of the leading causes of cancer-specific deaths. Particular characteristics of the disease associated with its location in the liver and mixed etiology remain a challenge. Surgery, both liver resection and liver transplant, is the recommended curative treatment for the

eligible patients.

In this course we will investigate what causes inequality between women and men. How does it arise, why does it take different forms, why does it vary in degree across societies, what are the components that add up to gender inequality, how do various institutions and practices contribute to it, and how does it change?

What Causes Gender Inequality? -- Robert Max Jackson

Table 3 shows the results from multivariate analyses. After adjusting for all related factors, the multivariate model revealed that being black or Hispanic, no college education, not in a good health status, being obese, low HDL cholesterol, and not consuming milk products daily were all significant independent correlates of vitamin D deficiency.
