GRAVITATIONAL CONSTANT - WIKIPEDIA

cavendish problems in classical pdf

Liberalism is a political and moral philosophy based on liberty and equality. Liberals espouse a wide array of views depending on their understanding of these principles, but they generally support civil rights, democracy, secularism, gender equality, racial equality, internationalism, freedom of speech, freedom of the press, freedom of religion, and free markets.

Liberalism - Wikipedia

The gravitational constant (also known as the "universal gravitational constant", the "Newtonian constant of gravitation", or the "Cavendish gravitational constant"), denoted by the letter G , is an empirical physical constant involved in the calculation of gravitational effects in Sir Isaac Newton's law of universal gravitation and in Albert Einstein's general theory of relativity.
