### **CBCL/1.5-5 - Syndrome Scale Scores**

The Child Behavior Checklist (CBCL) is a widely used caregiver report form identifying problem behavior in children. It is widely used in both research and clinical practice with youths. It has been translated into more than 90 languages, and normative data are available integrating information from multiple societies. Because a core set of the items have been included in every version of the ...

Objective . The OpenCV library provides us a greatly interesting demonstration for a face detection. Furthermore, it provides us programs (or functions) that they used to train classifiers for their face detection system, called HaarTraining, so that we can create our own object classifiers using these functions.

The histogram of oriented gradients (HOG) is a feature descriptor used in computer vision and image processing for the purpose of object detection. The technique counts occurrences of gradient orientation in localized portions of an image. This method is similar to that of edge orientation histograms, scale-invariant feature transform descriptors, and shape contexts, but differs in that it is ...

Descrição. O BTR-94 blindado de transporte de pessoal foi desenvolvida na Ucrânia na década de 1990. É essencialmente uma copia do Soviético BTR-80 APC com algumas alterações. A Jordânia ordenou 50 destes APCs em 1997.As entregas começaram em 2000.No entanto, em 2004, Jordânia doou todos os seus BTR-94s para o Iraque, provavelmente por causa de falhas.
