The General Certificate of Education (GCE) Advanced Level, or A Level, is a main school leaving qualification in England, Wales, Northern Ireland, the Channel Islands and the Isle of Man. It is available as an alternative qualification in other countries. It used to be the case that students would study over a two-year period, and that they would sit examinations at the end of each year (AS and ...

The liver and the pancreas have a central role in the regulation of blood glucose concentration. The cells in the pancreas secrete the hormones which tell cells to take up glucose from the blood or not take it up. On demand, glucose is made from broken down glycogen in the liver. The pancreas has alpha and beta cells. Alpha cells secrete glucagon which increases blood glucose concentration ...
