In 2011, negligence was the cause of 39% of all reported data breaches while malicious attacks (defined as a mixture of hacking and insider theft) accounted for 37% of the data breaches whereas the cause was hacking in more than one-quarter of these malicious attacks.

Guiding Principles in Information Security - InfoSec Resources

Content-addressable memory (CAM) is a special type of computer memory used in certain very-high-speed searching applications. It is also known as associative memory or associative storage and compares input search data (tag) against a table of stored data, and returns the address of matching data (or in the case of associative memory, the matching data).
