## **Cell Phone & Cell Tower Dangers Research Page**

Section 1: Cell Phones are Everywhere. Out of every 1000 calls made on cell phones, I would estimate that at least 925 are completely unnecessary, and another 50 are less than urgent and could be easily postponed.

ICNIRP thermal safety standard for pulsed Microwave Radiation is  $1000 \mu\text{W}/\text{cm}^2$  ( $10\text{W}/\text{m}^2$ ) . As early as 2000, some experts in bioelectromagnetics promoted a  $0.1 \mu\text{W}/\text{cm}^2$  limit (which is 0.614 Volts per meter) for ambient outdoor exposure to pulsed RF, so generally in cities, the public would have adequate protection against involuntary exposure to pulsed radiofrequency (e.g., from cell towers ...

Cell phones heat the brain while users make and receive calls. Cell phones scramble the brain and play havoc with the nervous system. This can cause high blood pressure, which leads to strokes.

Applications Electronic components. Polycarbonate is mainly used for electronic applications that capitalize on its collective safety features. Being a good electrical insulator and having heat-resistant and flame-retardant properties, it is used in various products associated with electrical and telecommunications hardware.

The National Toxicology Program concluded there is clear evidence that male rats exposed to high levels of radio frequency radiation (RFR) like that used in 2G and 3G cell phones developed cancerous heart tumors, according to final reports released today. There was also some evidence of tumors in the brain and adrenal gland of exposed male rats

Negative microbiological effects have also been recorded.. The WHO's International Agency for Research on Cancer (IARC) concluded in 2011 that RF radiation of frequencies 30 kHz - 300 GHz are possibly carcinogenic to humans (Group 2B). However, recent evidence, including the latest studies on cell phone use and brain cancer risks, indicate that RF radiation is proven carcinogenic to humans ...

Left: An EMR-emitting device attached to a telephone pole. Right: A cell tower. Since microwaves easily flow through most construction materials, "smart" meters attached to the outside of homes (or huge banks of them on multi-unit dwellings) broadcast a perpetual barrage of Group 2B radiation directly into the interior of inhabited buildings and right through all human flesh within range.

Con il termine inquinamento elettromagnetico si intende l'inquinamento derivante in genere da radiazioni elettromagnetiche non ionizzanti. Si parla quindi dell'intervallo di frequenze che va da 0 Hz (campi statici) alle frequenze della radiazione visibile (laser e luce incoerente).
