cells alive - organelles.pdf - Google Docs

Only living things have cells. Plant cells can be distinguished from animal cells by three characteristics. First, plant cells are bounded by a cell membrane and a rigid cell wall, whereas animal cells have only a cell membrane to protect their insides from the outside environment.

Plant and animal cells 1.1 - University of Hawaii at Hilo

Cells Alive Exploration Match the Organelle with its Function ____ 30. nucleus A Found inside the nucleus and produces ribosomes ____ 31. cell membrane B Controls all of the cells activities and contains DNA ____ 32. nucleolus C Packages materials for transport inside the cell ____ 33.

Animal Cell - Education Service Center, Region 2

Despite many similarities, plant and animal cells differ in a few different ways. The first difference is a structure known as chloroplasts, which plant cells have and animal cells do not. Chloroplasts are what give plants their green color. The second? major difference between plant and animal cells is the cell wall.

Plant and Animal Cells - National Oceanic and Atmospheric

Of all the living things, only bacteria are prokaryotic cells. A eukaryotic cell, on the contrary, has a nucleus to protect its DNA. Furthermore, all the organelles inside a eukaryotic cell are enclosed by their own membranes. Animals, plants, protists, and fungi are eukaryotic cells.
