Cellular and Molecular Immunology - Doody

Immunology is a branch of life-science which deals with the cellular and molecular events occurring in the body after

encounters of micro-organisms and other foreign substances. The history of immunology is quite old. In ancient China, people often used skin lesions of patients recovered from small pox to cure small pox in young children.

Cellular and Molecular Immunology Module1: Introduction

Immunology is the study of immune responses in this broader sense and of the cellular and molecular events that occur after an organism encounters microbes and other foreign macromolecules. Historians often credit Thucydides, in the fifth century BC in Athens, as having first mentioned immunity to an infection that he called plague (but that ...
