FREEZING OF GAIT: MOVING FORWARD ON A MYSTERIOUS CLINICAL

cerebellum and rhythmical movements pdf

Nystagmus is a condition of involuntary (or voluntary, in rare cases) eye movement, acquired in infancy or later in life, that may result in reduced or limited vision. Due to the involuntary movement of the eye, it has been called "dancing eyes". In a normal condition, while the head rotates about an axis, distant visual images are sustained by rotating eyes in the opposite direction on the ...

Review Freezing of gait: moving forward on a mysterious clinical phenomenon John G Nutt, Bastiaan R Bloem, Nir Giladi, Mark Hallett, Fay B Horak, Alice Nieuwboer Lancet Neurol 2011; 10: 734–44 Freezing of gait (FoG) is a unique and disabling clinical phenomenon characterised by brief episodes of inability to Department of Neurology, step or by extremely short steps that typically occur on ...

Freezing of gait: moving forward on a mysterious clinical

The Science Three-Level Hypothesized Explanation of the IM effect (McGrew, 2012). Interactive Metronome ® (IM) is believed to improve the resolution and efficiency of an individual’s internal brain clock(s) and temporal processing. In turn, it is hypothesized that this results in more efficient brain connectivity, communication, and synchronization via increased integrity of the brains white ...

The parasympathetic nervous system (PSNS) is one of the two divisions of the autonomic nervous system (a division of the peripheral nervous system (PNS)), the other being the sympathetic nervous system. (The enteric nervous system (ENS) is now usually referred to as separate from the autonomic nervous system since it has its own independent reflex activity.)

Parasympathetic nervous system - Wikipedia

Introduction. Stroke is a common global health-care problem that is serious and disabling. 1 In high-income countries, stroke is the third most common cause of death and is the main cause of acquired adult disability.1, 2 However, as most patients with stroke survive the initial injury, the biggest effect on patients and families is usually through long-term impairment, limitation of ...
