The GE90 - An Introduction GE-90 TURBOFAN ENGINE (CUT-AWAY VIEW) Built by General Electric in conjunction with SNECMA of France, IHI of Japan and FiatAvio of Italy, and first commissioned by the British Airways for its new fleet of Boeing 777s recently (September 1995), it is the most powerful commercial aircraft engine today.

The GE90 -An Introduction | Mohammed Gamal - Academia.edu

The IAE V2500 is a two-shaft high-bypass turbofan engine which powers the Airbus A320 family (A320, A321, A319 and the Airbus Corporate Jet), the McDonnell Douglas MD-90, and the Embraer KC-390.. International Aero Engines is a consortium backed by four aero-engine manufacturers, formed in 1983 to produce the engine. FAA type certification for the V2500 was granted in 1988.

IAE V2500 - Wikipedia

The Boeing 737 is a short- to medium-range twinjet narrow-body developed and manufactured by Boeing Commercial Airplanes in the United States. Originally developed as a shorter, lower-cost twin-engine airliner derived from the 707 and 727, the 737 has developed into a family of thirteen passenger models with capacities from 85 to 215 passengers.The 737 is Boeing's only narrow-body airliner in ...

Boeing 737 - Wikipedia

Accident Reports. This page is a complete list of all 172 Boeing 737 write-offs. It should be said that there have been other accidents with more serious damage than some of these listed here, but if the aircraft was repaired they do not appear.

MH370 Path around Penang Island. (Click on image to enlarge.) Introduction. The civilian radar data for MH370 that became publicly available in April 2018 provides insights as to how MH370 was flown after the transponder was disabled around 17:20:31 UTC. After flying by waypoint IGARI and turning back, the aircraft passed to the north of Kota Bharu Airport, crossed the Malaysian peninsula in a ...

MH370 Flight Around Penang « The Disappearance of MH370

Le 19 juillet 2013, le constructeur livra son 1 000 e A330 à la compagnie Cathay Pacific [7].Il s'agit du troisième appareil d'Airbus qui atteint cette production remarquable, après l'A320 et l'A319, et plus tôt que l'A321. Si les premiers A330 fabriqués sont en train de quitter les flottes, à partir de septembre 2013, plus de 1000 avions sont exploités.
