The rule of three is a writing principle that suggests that a trio of events or characters is more humorous, satisfying, or effective than other numbers. The audience of this form of text is also thereby more likely to remember the information conveyed because having three entities combines both brevity and rhythm with having the smallest amount of information to create a pattern.

Isocolon is a rhetorical scheme in which parallel elements possess the same number of words or syllables. As in any form of parallelism, the pairs or series must enumerate like things to achieve symmetry. The scheme is called bicolon, tricolon, or tetracolon depending on whether they are two, three, or four parallel elements. A well-known example of tricolon is Julius Caesar's "Veni, vidi ...

This is a fallacy that occurs quite frequently among men in the so-called manosphere- the fallacy of the "foreign woman." I agree that non-Western women's attitudes may be somewhat more palatable, due to them being the product of a less toxic culture, but strip away the layers of cultural/social conditioning and all women are fundamentally alike.
