The 21 Venomous and Dangerous Snakes of Hong Kong. Not sure if the Rhabdophis genus in Hong Kong is considered venomous and dangerous, or not. I've included it on the list as precautionary. At any rate, do not let one of these snakes bite down on you repeatedly or for any length of time (over 5-seconds). In some countries, R. subminiatus is considered deadly.

** Grab a PDF of this PagePrint this PageNon-Venomous Thailand Snakes 'Non-venomous' is really a misnomer. Many of the snakes you'll find at the links below possess venom, but most are not what we'd call "medically significant."

Non-Venomous Snakes | ThailandSnakes

We have two main types of venomous snakes in North America: pit vipers and coral snakes. Pit vipers are members of the Crotalidae family that includes rattlesnakes, copperheads, and cottonmouths. They have heat-sensing pits that help them find warm-blooded prey like rabbits and rodents.
