INTERVENTIONAL RADIOLOGY IN THE PROVISION AND MAINTENANCE

venous interventional radiology with pdf

Interventional radiology (IR), sometimes known as vascular and interventional radiology (VIR), is a radiology specialty which provides minimally invasive image-guided diagnosis and treatment of disease. Although the range of procedures performed by interventional radiologists is broad, the unifying concept behind these procedures is the application of image guidance and minimally invasive ...

Many patients who receive a Central Venous Catheter will require a CT scan. To streamline patient care, our Arrow ® CVCs are now available with pressure injection capabilities; up to 10 mL/sec of contrast for CT scanning.. If a central line is not rated for pressure-injectable contrast, the patient and clinician will need to wait for a second pressure injectable vascular access device to be ...

RADIOLOGY ORDERING GUIDE - Abington

The WFNS (World Federation of Neurosurgical Societies) grading system uses the Glasgow Coma Scale and presence of focal neurological deficits to grade the severity of subarachnoid hemorrhage. This grading system was proposed in 1988, and this is one of the accepted systems (although not considered the best) at the time of writing (August 2016).
