In medicine, a peripheral venous catheter (PVC), peripheral venous line or peripheral venous access catheter is a catheter (small, flexible tube) placed into a peripheral vein for intravenous therapy such as medication fluids. Upon insertion, the line can be used to draw blood.. The catheter is introduced into the vein by a needle (similar to blood drawing), which is subsequently removed while ...

Peripheral venous catheter - Wikipedia

Central venous pressure (CVP) is the blood pressure in the venae cavae, near the right atrium of the heart.CVP reflects the amount of blood returning to the heart and the ability of the heart to pump the blood back into the arterial system. CVP is often a good approximation of right atrial pressure (RAP), although the two terms are not identical, as a pressure differential can sometimes exist ...
