Hi Stephen, Good question! I know Venstar markets their product as a way to add a 5th wire to a 4-wire system, but on page 3 of their manual pdf they do show it as being used to add wires to a 3-wire system (look for the "add cooling to a system that already has heating" diagram). However, all these diagrams assume there's a blue wire, which you don't seem to have (unless you do and it ...

Thermostat Terminal Designations Explanations - You are wiring a new thermostat or about to wire a new thermostat and you want to understand what the terminal designations are on your old and your new thermostat. Why is it such a mystery with these terminal designations? Once you get into seeing how this works it all becomes common sense.

### **Thermostat Terminal Designations HVAC Wiring**

Thermostat wire comes in various weights. If you have heat and AC, you'll need 18/5. If you've only got heat, 18/3 is sufficient but you may want to run 18/5 anyway for a bit of future-proofing.
