ventricular tachyarrhythmias in the pdf

Ventricular tachycardia (V-tach or VT) is a type of regular, fast heart rate that arises from improper electrical activity in the ventricles of the heart. Although a few seconds may not result in problems, longer periods are dangerous. Short periods may occur without symptoms, or present with lightheadedness, palpitations, or chest pain. Ventricular tachycardia may result in cardiac arrest and ...

MR-CONDITIONAL CARDIAC DEVICE SUMMARY CHART

x In the present issue of the International Journal of Cardiology Mavrogeni et al. [1] addressed the relevant topic of arrhythmias in patients affected by various rheumatic disorders. As Clinicians know, the abrupt onset of arrhythmias might severely complicate the clinical picture of these patients despite a persistent normal regional and global left ventricular function.

Heart arrhythmia (also known as arrhythmia, dysrhythmia, or irregular heartbeat) is a group of conditions in which the heartbeat is irregular, too fast, or too slow. A heart rate that is too fast – above 100 beats per minute in adults – is called tachycardia and a heart rate that is too slow – below 60 beats per minute – is called bradycardia. ...
